# CHILDHOOD ASTHMA CONTROL TEST FOR CHILDREN 4 TO 11 YEARS

## KNOW YOUR SCORE

**Parent or Guardian:** The Childhood Asthma Control Test\* is a way to help your child's healthcare provider determine if your child's asthma symptoms are well controlled. **Take this test with your child (ages 4 to 11). Share the results with your child's healthcare provider.**

- Step 1** Have your child answer **the first four questions (1 to 4)**. If your child needs help, you may help, but let your child choose the answer.
- Step 2** Answer the last **three questions (5 to 7)** on your own. Don't let your child's answers influence yours. There are no right or wrong answers.
- Step 3** Write the number of each answer in the score box to the right.
- Step 4** Add up each score box for the total.
- Step 5** Take the COMPLETED test to your child's healthcare provider to talk about your child's total score.

If your child's score is **19 or less**, your child's asthma symptoms may not be as well controlled as they could be. No matter what the score, bring this test to your child's healthcare provider to talk about your child's results.
